Overview

History

Fleurieu Civil and Construction Pty Ltd formally commenced operations in 2005. Before this, the business was solely operated by founder Mark Miller, trading as Mark Miller Trenching and Earthmoving from 1990 to 2005 with the inception of Fleurieu Civil.

In 2022 the business was purchased by Adam Frith, an experienced tradesman, project and business manager in the energy, mining and Government sectors.

With the change in ownership Fleurieu Civil has grown its business by expanding its customer base and increased diversification, necessitating the acquisition of more specialised equipment, recruitment of additional staff and becoming a full member of the Civil Contractors Federation.

Future

Today, Fleurieu Civil is a key regional contractor to Utility, Local Government and private sector organisations. We provide full turnkey civil infrastructure solutions to our clients.

Our multi-faceted construction expertise allows us to specialise in small to large civil infrastructure projects, particularly relating to Utility Authorities and Local Government.

We are proud to be regionally based and actively seek to service and engage with regional industry and the community, specifically local contractors to support the delivery of local projects. We pride ourselves on our quality and safety record, continually seeking to improve our workplace practices.

We are committed to innovation and industry best practice, whether utilising new equipment or through the up-skilling of our workforce.

Towards Our Future

We have bold and ambitious plans to expand our operations and services nationally with the same level of quality as we have over the entire journey.

05.

Purpose

At Fleurieu Civil, we strive to provide exceptional service along with quality assurance that will ensure our clients will have peace of mind that the projects will be delivered on time and on budget.

Our key to success

Our Business Vision

To be recognised as South Australia's Regional Civil Construction Company of choice, known for our expertise in water and waste water construction and our commitment to excellence and innovation in all areas of civil construction.

Our Business Mission

To provide exceptional civil construction services to our clients, working collaboratively with industry and regional communities to deliver high-quality, cost-effective solutions that meet the needs of families and businesses across South Australia.

We are dedicated to maintaining the highest standards of safety, sustainability, and innovation in all our work, while preserving and enhancing the natural landscapes of the regions we serve.

Our Business Values

OWNERSHIP

We are owners of what we do, and we take results personally

STANDARDS

Bringing a higher standard to what we do - projects, values and experiences

AGILITY and INNOVATION

Change is an opportunity not a threat

PERFORMANCE

We strive for Excellence, it's not a skill it's an attitude

ENVIRONMENT

We strive to minimize our environmental impact and promote sustainable practices in all areas of our operations.

“ Capability Poly Welding

We take pride in offering highest quality HDPE poly welding services for a wide range of applications. Whether you need to join or repair HDPE (High-Density Polyethylene) pipes, tanks, or other structures, our experienced team is here to meet your needs with precision and expertise.

What sets us apart is our commitment to delivering high-quality welding solutions that ensure the integrity and durability of your HDPE installations. Our skilled technicians are trained in the latest industry techniques and equipped with state-of-the-art welding equipment to tackle projects of any size or complexity.

Here's what you can expect when you choose our HDPE poly welding services:

Expertise:

Our team consists of highly trained professionals with extensive knowledge and experience in HDPE poly welding. We stay up to date with the latest industry standards and techniques to ensure the highest level of craftsmanship.

Versatility:

We offer a wide range of HDPE poly welding services to cater to various needs. Whether you require butt fusion, electrofusion, socket fusion, or any other welding method, we have the expertise to handle it efficiently and effectively.

Custom Solutions:

We understand that each project is unique, and we tailor our services to meet your specific requirements. Our team works closely with you to understand your needs, providing custom solutions that are designed to deliver optimal results.

Quality Assurance:

We are committed to maintaining the highest standards of quality in our work. We utilize industry-leading welding techniques and equipment, ensuring that every

08.

weld is performed with precision and accuracy. Our goal is to provide durable, leak-free joints that withstand the test of time.

Timely Completion:

We understand the importance of deadlines, and we strive to complete projects within the agreed-upon timeframe. Our efficient workflows and skilled team enable us to deliver results promptly without compromising on quality.

Safety and Compliance:

Safety is our top priority. We adhere to strict safety protocols to protect our team, your property, and the environment during all stages of the welding process. Additionally, we ensure compliance with relevant industry regulations and standards to guarantee a reliable and safe installation.

Excellent Customer Service:

We are dedicated to delivering an exceptional customer experience. From the initial consultation to project completion, our friendly and knowledgeable team is here to address your questions, provide updates, and ensure your satisfaction every step of the way.

“

Capability Earthworks

At Fleurieu Civil we specialise in road construction, concrete infrastructure, minor earthworks and subdivisions. Our dedicated team of experts is here to provide you with top-notch solutions that meet your specific needs and exceed your expectations.

Road Construction:

With our road construction services, we strive to create safe and durable road networks that facilitate efficient transportation and connectivity. Whether you require new road construction, road extensions, or road rehabilitation, our experienced professionals have the expertise to handle projects of all sizes. We employ advanced techniques and adhere to industry standards to ensure the highest quality results.

Concrete Infrastructure:

Our concrete infrastructure services encompass a wide range of applications, including the construction of foundations, retaining walls, curbs, sidewalks, and more. We utilize state-of-the-art equipment and employ skilled craftsmen to deliver structurally sound and visually appealing concrete structures. From small-scale projects to larger undertakings, we have the knowledge and resources to bring your vision to life.

Sub-divisions:

If you're planning a sub-division project, our team is well-equipped to handle all aspects of the process. We understand the intricacies involved in dividing land and creating new parcels, and we work closely with developers and local authorities to ensure compliance with zoning regulations and subdivision standards. Our services encompass land preparation, infrastructure development, drainage systems, road networks, and more

“ Capability Water & Wastewater Infrastructure

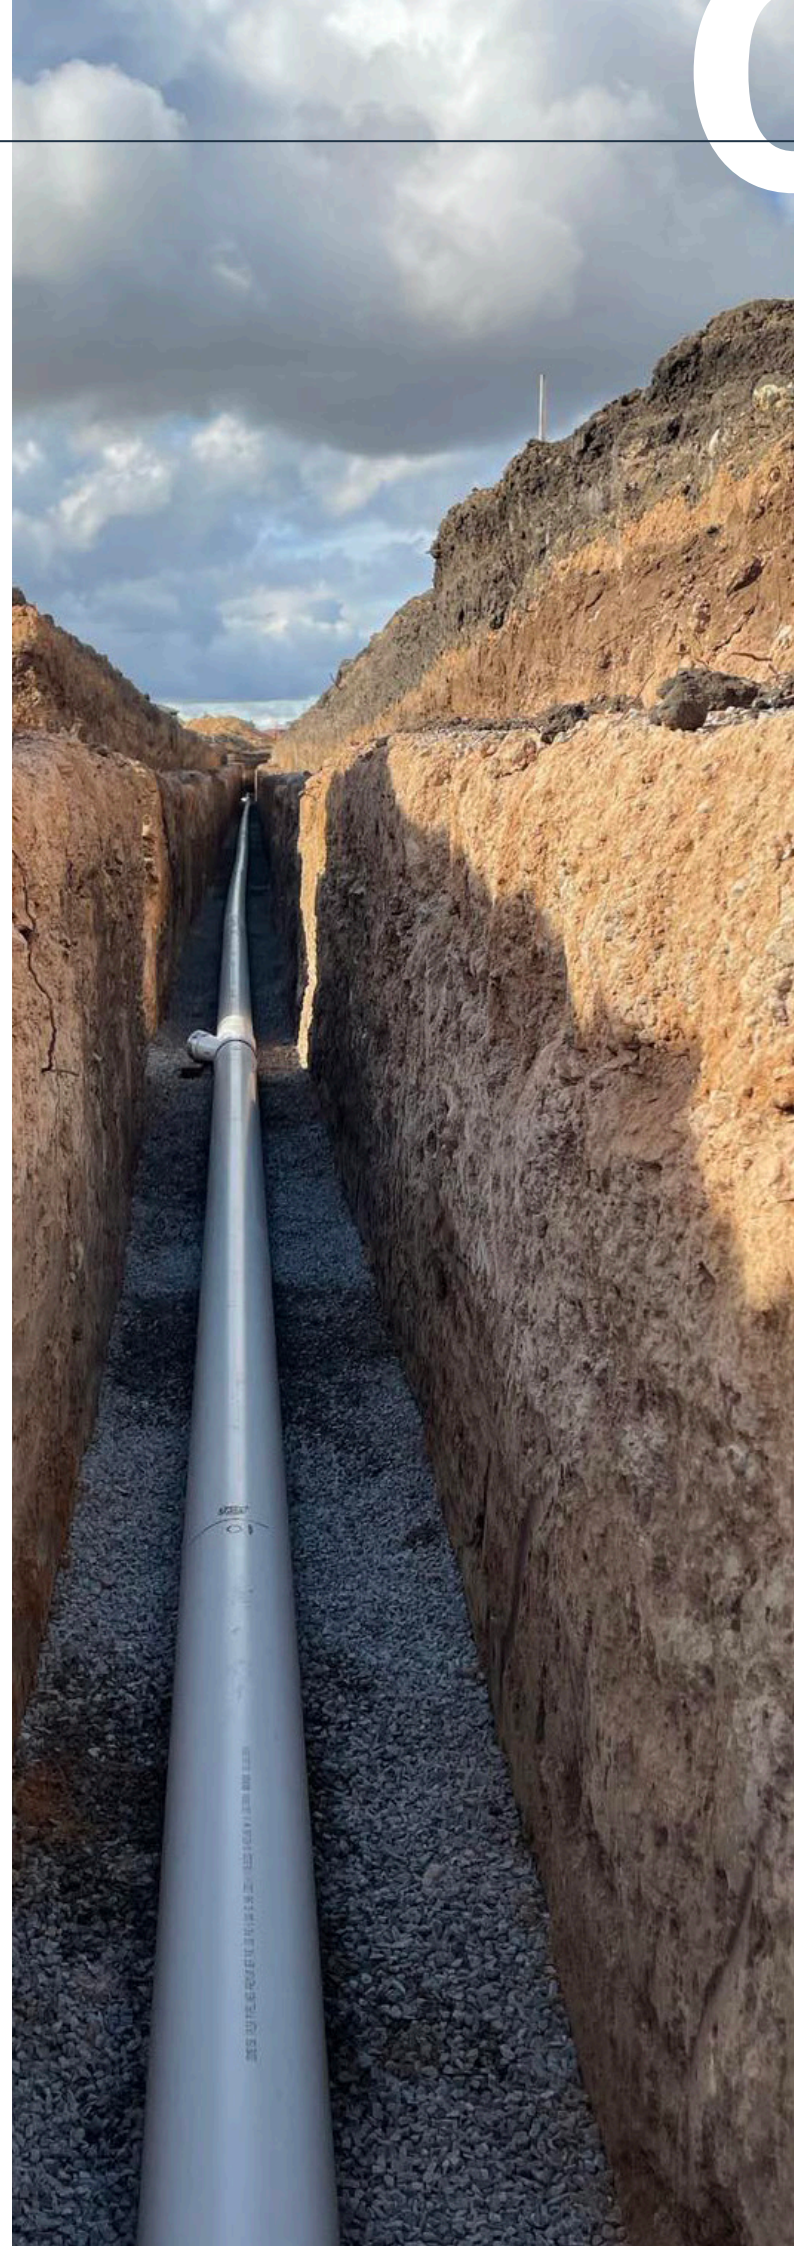

We understand the critical importance of water and wastewater infrastructure in maintaining public health, environmental balance, and overall quality of life. With our specialized expertise, we offer a wide range of services tailored to meet the unique challenges of this vital sector.

Our team of highly skilled professionals combines their deep industry knowledge with the latest technological advancements to provide innovative solutions for water and wastewater infrastructure. Whether it's designing and constructing new systems, upgrading existing facilities, or maintaining and optimizing operations, we strive for excellence in every project we undertake.

From large-scale municipal projects to industrial installations, we have the capabilities to handle diverse and complex assignments. Our services encompass feasibility studies, engineering design, project management, construction supervision, equipment procurement, and commissioning. We work closely with our clients, ensuring seamless collaboration and understanding of their specific requirements and regulatory obligations.

At Fleurieu Civil, we prioritize sustainability and environmental stewardship. We aim to minimize the ecological impact of our projects while maximizing the efficiency and resilience of water and wastewater systems. Our solutions incorporate advanced technologies, energy-efficient practices, and innovative approaches to water management, enabling our clients to achieve long-term sustainability goals.

With an unwavering commitment to quality and safety, we adhere to the highest industry standards and follow rigorous protocols at every stage of our projects. Our team's expertise, combined with our extensive network of trusted partners and suppliers, enables us to deliver superior results on time and within budget.

“ Capability Pipelines

We are your go-to destination for first rate pipeline construction services. We specialize in providing high-quality construction solutions for a wide range of pipes, including PVC, DICL, CICL, RCP, and HDPE just to name a few.

With years of industry experience, our team of skilled professionals is dedicated to delivering exceptional results in every project we undertake. Whether you need a pipeline installation, repair, or maintenance, we have the expertise and resources to handle it with precision and efficiency.

At Fleurieu Civil, we understand the critical role that pipelines play in various industries, from water supply and wastewater management to oil and gas transportation. That's why we prioritize the use of superior materials and employ cutting-edge techniques to ensure the longevity and reliability of our constructed pipelines.

Our commitment to excellence extends beyond construction. We also offer comprehensive consulting services to help you plan and design pipelines tailored to your specific requirements. Our team will work closely with you to understand your needs, assess the terrain and environmental factors, and develop customized solutions that optimize performance and minimize potential risks.

When you choose Fleurieu Civil, you can expect unparalleled professionalism, exceptional craftsmanship, and strict adherence to safety standards. We are fully licensed and insured, giving you peace of mind throughout the entire construction process.

We take pride in our ability to handle projects of all sizes, from small-scale installations to large-scale industrial pipelines. Our streamlined project management approach ensures efficient coordination and timely completion, without compromising on quality.

Capability Fabrication

Fleurieu Civil are proud to collaborate with RJ Engineering services for all our steel fabrication, engineering, and mechanical services, with a specialisation in pipe and structural fabrication. We are dedicated to delivering high-quality solutions tailored to meet the unique requirements of our clients. Our experienced team of professionals combines expertise with innovation to provide top-notch services in the field of steel fabrication.

Steel Fabrication:

Our steel fabrication services encompass a wide range of capabilities, allowing us to handle projects of varying complexity and size. We utilize cutting-edge technology and advanced techniques to fabricate steel structures with precision and efficiency. Our team has the expertise to deliver exceptional results across all project scales.

Pipe Fabrication:

We specialise in pipe fabrication, offering customised solutions to meet the specific needs of our clients. With our state-of-the-art equipment and skilled workforce, we can fabricate pipes of various materials, sizes, and specifications. Our comprehensive approach ensures that the fabricated pipes meet the highest quality standards.

Structural Fabrication:

Our expertise extends to structural fabrication, where we excel in creating robust and reliable structures. Whether it's beams, columns, trusses, or other structural elements, we have the proficiency to deliver precise fabrication according to engineering specifications. We meticulously manage every aspect of the process, from design to installation, to ensure that the final structure meets all safety and performance requirements.

Engineering Services:

In addition to fabrication, we provide comprehensive engineering services to support your projects. Our team of experienced engineers possess a deep understanding of structural and mechanical engineering principles. We can assist you with design analysis, feasibility studies, value engineering, and project management, ensuring that your project progresses smoothly from conception to completion.

Mechanical Services:

We offer a wide range of mechanical services to cater to the diverse needs of our clients. Our skilled technicians can handle tasks such as equipment installation, maintenance, repair, and retrofitting.

Whether it's industrial machinery, HVAC systems, or specialized mechanical components, we have the knowledge and expertise to deliver reliable and efficient solutions.

Quality Assurance:

At Fleurieu Civil, quality is paramount. We adhere to stringent quality control measures throughout every stage of the fabrication and engineering process. Our commitment to excellence ensures that the final products and services meet or exceed industry standards. We employ rigorous inspection procedures to guarantee the durability, functionality, and safety of all our fabricated structures and mechanical installations.

Customer Satisfaction:

We prioritise customer satisfaction and strive to build long-term relationships with our clients. Our team is dedicated to understanding your unique requirements and providing tailored solutions that align with your project goals. We prioritize effective communication, timely project delivery, and a collaborative approach to ensure that your expectations are met or surpassed.

“

Capability

Live Water Main Tapping

We offer an innovative and cutting-edge service that revolutionizes the way you tap into pressurized pipes. Our technology allows for live access to pipelines without the need to shut down or interrupt the flow of fluids, saving you time, money, and minimizing downtime. With Live Tapping, you can make critical connections, perform repairs, and conduct inspections while keeping operations running smoothly.

Key Features and Benefits:

Non-intrusive and Safe: Our LiveTap technology ensures a non-intrusive and safe approach to accessing pressurized pipes. There's no need for costly and time-consuming shutdowns, which translates to minimal disruption to your operations and increased safety for your personnel.

Real-time Access:

With Live Tapping, you gain real-time access to pressurized pipes. This means you can quickly establish new connections, add valves or sensors, or perform maintenance tasks while the fluids continue to flow uninterrupted. This reduces downtime and increases overall efficiency.

Versatility:

Our Live Tapping system is versatile and compatible with various pipe materials, sizes, and fluid types. Whether you're working with water, oil, gas, or other substances, Live Tapping offers a reliable solution to tap into pressurized lines with ease.

Enhanced Accuracy:

Our advanced monitoring capabilities provide accurate real-time data, allowing you to make informed decisions during the tapping process. Monitor pressure, flow rates, and other vital parameters to ensure successful and precise connections.

Cost-effective Solution:

By eliminating the need for shutdowns and associated costs, Live Tapping significantly reduces the overall expense of pipe tapping projects. You can maximize your resources and minimize operational downtime, ultimately leading to cost savings for your organization.

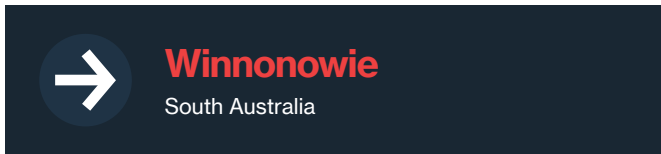

Minimized Environmental Impact:

Our live tapping technique ensures minimal environmental impact. By avoiding the release of fluids during the process, LiveTap promotes sustainability and adheres to the highest environmental standards.

Expert Support:

At Fleurieu Civil, we understand that each project is unique. Our team of experts is ready to assist you from start to finish, providing guidance, technical support, and customized solutions tailored to your specific requirements.

Project Profile.

Project Description

Fleurieu Civil & Construction were engaged by SA Water to install 4,978m of DN200 MPVC in Winnowie just south of Port Augusta.

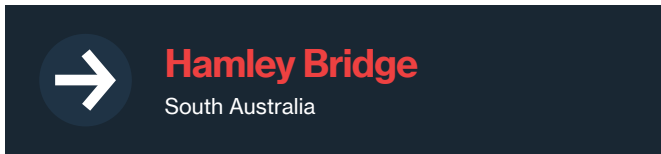

The project included the development of a new service road and management of local vegetation through thorough environmental considerations

The construction included:

- 4,978m of DN200 MPVC
- 48m of DN250 HDPE directional bore under the Horrocks Pass Highway
- Installation of 3 stop valve assemblies
- 56m od DN200 Ductile DCTJ dog legs for watercourse works
- 14x fire plugs
- Full system flush, chlorination and commissioning

The project was executed on time, budget and with zero safety events. A great achievement by the team working in a remote environment.

Project Profile.

Project Description

Fleurieu Civil & Construction were engaged by SA Water to install 981m of DN300 DICL in Hamley Bridge.

The project included the development of a new service road and management of local vegetation through thorough environmental considerations

The construction included

- 981m of DN300 DICL pipe (ductil iron cement lined)
- 48m of DN100 DICL
- Installation of 3 stop valve assemblies
- 6x stop valve assemblies
- 3x fire plugs
- Reinstatement of roads
- Full system flush, chlorination and commissioning

The project was executed on time, budget and with zero safety events. A great achievement by the team working in a remote environment.

Project Profile.

Project Description

In partnership with a Tier 1 contractor, Fleurieu Civil & Construction helped construction in the provision of equipment and operators in the re-furnishment and installation of turning lanes at the Koonibba / Eyre Highway intersection (40km West of Ceduna).

- Jobs performed:
- Boxout to subgrade (excavator)
- Rock Excavation
- PM2/20 Subgrade
- Earthworks trim (swale shaping)
- Drainage
- PM1/20 base course
- Culvert installation
- Final Trim
- Topsoil re-spread
